

Pay Equity Official Supporter Form

Leading employers recognise that pay equity is essential to superior business performance, yet pay gaps persist within Australian workplaces. The national pay gap is currently 15.3%, and only around one quarter of employers have conducted a gender pay gap analysis.

To raise awareness of this issue and drive change the Workplace Gender Equality Agency works with a network of industry groups and membership bodies committed to taking action on pay equity and gender equality.

Pay Equity Official Supporters help to create change by showcasing and promoting best practice on gender equality in their industry.
