Appendix A 8
Risk Analysis & Evaluation Framework 8
Appendix B 10
Risk Identification & Analysis Worksheet 10
1. Background
This Risk Management Policy outlines how the Agency manages risk.

Terms and definitions used throughout this policy are as outlined in AS/NZS ISO 31000:2018 Risk Management – Principles and Guidelines which describe risk as the ‘effect of uncertainty on objectives’ and risk management as the ‘coordinated activities to direct and control an organisation with regard to risk’.

2. Related Resources
- WGEA-Risk Register
- WGEA-Business Continuity Plan
- WGEA- Fraud Control Plan
- WGEA- Protective Security Policy
- Commonwealth Risk Management Policy.

3. Approach
The Public Governance, Performance and Accountability Act 2013 (PGPA Act) framework requires that the accountable authority of a Commonwealth entity must establish and maintain appropriate systems and internal controls for the oversight and management of risk. Commonwealth entities are encouraged to engage with risk in a positive and transparent way to achieve strategic objectives whilst limiting unnecessary red tape.

Effective risk management is recognised as the cornerstone of good corporate governance, sound management practice and sustainable organisational success.

The Agency complies with the nine elements of the Commonwealth Risk Management Policy:
- Establishing a risk management policy;
- Establishing a risk management framework;
- Defining responsibility for managing risk;
- Embedding systematic risk management into business processes;
- Developing a positive risk culture;
- Communicating and consulting about risk;
- Understanding and managing shared risk;
- Maintaining risk management capability; and
- Reviewing and continuously improving the management of risk.

The Workplace Gender Equality Agency is charged with promoting and improving gender equality in Australian workplaces with a vision for women and men to be equally represented, valued and rewarded in the workplace. We achieve this through the provision of advice and assistance to employers and the assessment and measurement of workplace data.

Risk management is a key business process and an essential component of management within the Agency. The Agency takes an enterprise risk management approach that is structured, disciplined and integrated which facilitates the management of key risks.

The Agency promotes a culture in which risks are proactively identified and managed by considering both threat and opportunity.

Risk is viewed in the context of the business strategy and management of risk is facilitated by:
- ensuring that risks faced by the Agency are understood and managed
- promoting an Agency approach to risk management, including a common "risk" language
- instilling an awareness of risk in management and staff to ensure that risk is considered as an essential factor of all project planning and in all decision making
- creating an environment in which all Agency staff assume responsibility for managing risk
- ensuring that risks to the Agency are appropriately monitored through formal documentation and regular review
- ensuring transparency in decision-making and ongoing risk management processes
- operating within the parameters of the risk appetite agreed by the Management team
risk status and identification is a standard topic on the Executive Team Meeting.

4. **Risk appetite and risk tolerance**
   - As a government agency, our risk appetite is generally low. This is particularly so in relation to the Agency’s regulatory role. However, the Agency strives for a higher tolerance for risk in its role as an influencer and educator. The Agency must operate within government rules and regulations including the *Public Governance, Performance and Accountability Act 2013, Public Service Act 1999, Commonwealth Procurement Rules 2012* and *APS Values and Code of Conduct*. When assessing risk, the Agency always aligns with the APS values and considers the government ethos and the external operating environment to determine how best to manage risk.

5. **Potential risks**
   - Potential risks for the Agency are categorised into 5 main areas:
     - political
     - business processes and systems
     - financial
     - people
     - reputational / licence to operate
   - Each of these risk categories is outlined in Appendix A: Risk Analysis and Evaluation Framework.

6. **Risk management process**
   - There are six steps in the risk management process adopted by the Agency:
     - establish the context
     - identify risks
     - analyse risks
     - evaluate risks
     - treat risks
     - monitor and review risks

   ![Risk Management Process Diagram](image)

   **6.1 Establish the context**
   - Define the external and internal parameters to be taken into account when managing risk
   - External context can include:
     - cultural, social, political, legal, regulatory and financial factors
     - key drivers and trends that impact on the objectives of the Agency
     - relationships with, and the perceptions and values of external stakeholders
   - Internal context can include:
governance, organisational structure, roles and accountabilities
- policies, objectives and associated strategies
- capabilities
- information system/s (formal & informal)
- relationships with, and the perceptions and values of internal stakeholders
- culture of the Agency

6.2 Risk identification
- The process of finding, recognising and describing risk:
  - sources of risk
  - events
  - the cause and potential consequences
- The aim is to generate a list of risk-based events that might create, enhance, prevent, degrade, accelerate or delay the achievement of the objectives of the Agency.

6.3 Risk analysis
- Consideration of the cause/s and source/s of each risk, positive and negative consequences and likelihood of consequences occurring
- Analysis of existing controls and their effectiveness and efficiency
- Determination of whether the risks are acceptable or unacceptable
- Determination of impact or damage to the Agency if the risk becomes a reality

6.4 Risk evaluation
- Risk evaluation assists the Agency in making decisions based on the outcome of risk analysis. The Agency evaluates which risks need treatment and then prioritises each for treatment.

Refer to Appendix A: Risk Analysis and Evaluation Framework for the risk analysis matrix, risk level descriptors and likelihood criteria used by the Agency in analysing and evaluating risk.

6.5 Risk treatment
- The Agency selects one or more options for modifying risk and implements those options. Treatment options include:
  - avoiding the risk by not starting or continuing with an identified activity
  - taking or increasing the risk in order to pursue an opportunity
  - removing the source of the risk
  - changing the likelihood of the risk
  - sharing the risk with another party
  - retaining the risk by informed decision
- Treatment is a cyclical process:
  - assess a risk treatment
  - decide whether residual risk levels are tolerable
  - if not tolerable, generate a new risk treatment
  - assess the effectiveness of that treatment
- The Agency risk register includes the risk category and descriptor, likelihood of risk occurring, the consequence of the risk, the risk level, the risk owner and the risk treatment.
- Refer to Appendix B: Risk Identification & Analysis Worksheet for documentation of the identification, analysis and treatment decisions.

6.6 Communicating and consulting about risk
- A consultative team approach to risk within the Agency assists with:
  - establishing the context appropriately
  - ensuring that the interests of stakeholders are understood and considered
  - ensuring that risks are adequately identified
  - assembling different and disparate areas of expertise for analysing risks
  - ensuring that different and disparate views are appropriately considered when defining the risk criteria and evaluating risks
  - securing endorsement and support for a treatment plan
  - enhancing appropriate change management during the risk management process
7. Management structure and governance

- The Director is responsible for the overall management of risk within the Agency.
- The Operations team are responsible for the centralised oversight of the risk system.
- The Executive Management team is responsible for establishing the Agency’s risk appetite and tolerance, conducting an annual risk review as part of the Agency’s strategic review and reviewing and monitoring Agency-wide risks on a regular basis.
- Managers are responsible for applying the Agency risk management policy and practices in their areas of responsibility.
- Each business unit is responsible for reviewing and monitoring its business unit risks quarterly.
- The Agency’s Audit Committee provides independent oversight of the risk system.
- All Agency project plans must include risk identification and assessment.
- Effective risk management is a requirement of all Agency staff. Agency staff are accountable for identifying and actively managing risks within their day-to-day work. In specific terms this means:
  - Managers and staff need to be familiar with the application of this policy in business activities.
  - Managers need to support and encourage Agency staff in managing risks in the workplace, and in documenting the identification of risks and the treatments so that appropriate audit trails are maintained.
  - Managers and staff are responsible for Agency compliance activities (for example, PGPA Act, WH&S, protective security, fraud, IT security and procurement) are accountable for ensuring effective management of activities to ensure compliance.

8. Maintaining risk management capability

- The Agency provides guidance material on risk identification, assessment and management to staff at induction, through this policy and within governance and project planning tools.
- All Agency staff undertake training in Protective Security on an annual basis and members of the Executive team are required to undertake Comcover training on Risk Management in the Commonwealth.

9. Monitoring and review

- The Agency regularly monitors and reviews Agency-wide risks, risks within business units and project-related risk to ensure risk evaluation is current and up-to-date.
- Considerations include:
  - are the controls effective and efficient?
  - is there new information?
  - analyse lessons learnt from events such as near misses, changes, successes, failures
  - detect changes and review risk treatments
  - identify emerging risks

The WGEA Risk Management Policy is published on the website for the benefit of external stakeholders and discussion of risk forms part of the stakeholder engagement for all Agency projects.
# Risk Analysis & Evaluation Framework

## Risk Analysis Matrix

<table>
<thead>
<tr>
<th>Likelihood</th>
<th>Insignificant</th>
<th>Minor</th>
<th>Moderate</th>
<th>Major</th>
<th>Extreme</th>
</tr>
</thead>
<tbody>
<tr>
<td>Almost Certain</td>
<td>LOW</td>

</tbody>
</table>

## Risk Level Descriptors

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EXTREME</td>
<td>Executive management need to be informed and involved in the decision making to accept/mitigate the risk</td>
</tr>
<tr>
<td>HIGH</td>
<td>Executive management attention needed and management responsibility specified</td>
</tr>
<tr>
<td>MEDIUM</td>
<td>Manage by specific monitoring or response procedures</td>
</tr>
<tr>
<td>LOW</td>
<td>Manage by routine procedures, unlikely to need specific application of resources</td>
</tr>
</tbody>
</table>

## Consequence Criteria

<table>
<thead>
<tr>
<th>Category</th>
<th>Insignificant</th>
<th>Minor</th>
<th>Moderate</th>
<th>Major</th>
<th>Extreme</th>
</tr>
</thead>
<tbody>
<tr>
<td>People</td>
<td>Minor skills impact</td>
<td>Minor impact to capability</td>
<td>Unavailability of core skills affecting services</td>
<td>Unavailability of critical skills or personnel</td>
<td>Protracted lack of critical skills/people</td>
</tr>
<tr>
<td></td>
<td>Minor injury</td>
<td>Medical Treatment</td>
<td>Major Injury</td>
<td>Death</td>
<td>Multiple Deaths</td>
</tr>
<tr>
<td>Financial</td>
<td>Less than marginal chance of material effect on value of financial assets.</td>
<td>Limited reduction in value of small proportion of financial assets.</td>
<td>Loss of financial assets/temporary reduction in value of significant proportion of financial assets.</td>
<td>Loss of significant proportion of financial assets/significant reduction in value of financial assets.</td>
<td>Total loss of financial assets/permanent reduction in value of financial assets.</td>
</tr>
<tr>
<td>Reputation/Licence to operate</td>
<td>Internal dissent/criticism</td>
<td>Criticism from minor community segment/Adverse press coverage.</td>
<td>Criticism from the Government and Public Service.</td>
<td>Local public outrage/condemnation and high level political criticism.</td>
<td>National public outrage/condemnation and high level political criticism.</td>
</tr>
<tr>
<td>Business process and systems</td>
<td>Minimal impact on non-core business operations. Impact can be dealt with by routine operations.</td>
<td>Some impact on business areas (e.g. delays, systems quality), able to be dealt with at operational level.</td>
<td>Impact on business resulting in reduced performance. Targets are not met. Activity not threatened, but may be subject to significant review or changed operations.</td>
<td>Breakdown of key activities leading to reduction in business performance (e.g. service delays, client dissatisfaction, revenue loss, legislative breaches). Survival of activity threatened.</td>
<td>Critical business failure, preventing performance of core activities. Impact threatens not only the survival of the activity, but the Agency itself.</td>
</tr>
</tbody>
</table>
## Likelihood Criteria

<table>
<thead>
<tr>
<th>Likelihood</th>
<th>Historical Probability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Almost certain</td>
<td>Has occurred on an annual basis in WGEA in the past or circumstances are in train that will cause it to happen.</td>
</tr>
<tr>
<td>Likely</td>
<td>Has occurred in the last few years in WGEA or has occurred recently in similar agencies or circumstances have occurred that will cause it to happen in the next few years.</td>
</tr>
<tr>
<td>Possible</td>
<td>Has occurred at least once in the history of WGEA or is considered to have a limited chance of occurring in the next few years.</td>
</tr>
<tr>
<td>Unlikely</td>
<td>Has never occurred in WGEA but has occurred infrequently in similar agencies or is considered to have a marginal chance of occurring in the next few years.</td>
</tr>
<tr>
<td>Rare</td>
<td>Is possible but has not occurred to date in any similar agency and is considered to have very much less than a marginal chance of occurring in the short term.</td>
</tr>
</tbody>
</table>
Risk Identification & Analysis Worksheet

This form is to be used to document Agency decision making in respect to risk identification, analysis and evaluation. For further information on Risk Management, including detailed definitions please refer to the WGEA Risk Management Policy.

Briefly describe the risk identified.

____________________________________________________________________

What is the level of impact (please circle one)?

Agency wide Team level Project Individual

What controls are already in place to address this risk?

____________________________________________________________________

What additional risk treatment is required?

____________________________________________________________________

Using the Risk Analysis Matrix below determine (and circle) the risk rating by assessing Likelihood and Consequence. Provide reasons for your assessment:
